Vaccinations: Whole herd vaccinations to regular youngstock vaccinating, reminders, deliveries, and administration.

Scoring: Mobility, Condition, Rumen: Our VetTech is a ROMS trained mobility scorer, providing you with a clear and simple report helping to improve herd health and meet the increasing standards demanded by Red Tractor and many milk contracts. Each report shows the progress since the last assessment and problem cows are clearly identified for treatment if required.

Jade Scot-Dalgleish Our
New VetTech

Calf Routines: are new services we are offering for youngstock. These include growth checks/calf weighing, disbudding, vaccinations, colostrum immunity testing and reports. These routines ease your workload and ensure youngstock are getting quality and regular care, keeping every animal up to date with disbudding and vaccinations and taking the pressure off you. You can make use of these services at a frequency that works for your farm e.g. weekly, fortnightly or monthly.

Fly control: We have a new way to deal with the pesky flies that drive us all mad every year. Clover Friendly Flies are pteromalid wasps, also known as fly parasites. They attack fly larvae, reducing the number of larvae that turn in to flies. This is a sustainable approach to fly control, leading to less fly treatment being needed for your animals and in the parlour.

Small Holder Services: We are offering full detailed health calendars and services to help our smallholders stay on top of routine treatments, such as hoof care, vaccinations, faecal egg counts, worming and much more. Our VetTech will provide regular reminders for routine interventions and can attend your holding to give any help needed in administering treatment.

Samples: Our VetTech is trained to collect a variety of samples for diagnostic testing e.g.

Faecal egg counts, bloods, milk samples for disease identification and will issue reminders for routine testing.

Anything else?

Or if you just need extra hand for few hours, whether that is needing extra labour for your tb test, vaccinating, or even just getting sheep in from the field ready for lambing, give us a shout and we might be able to help. It can save you paying someone for all day or if you're struggling for staff.

Holstein Friesian heifers met a premium for £1050 to £1180 all from HG Perkins & Sons. Framed feeders also keenly sought after to £1000 (22mo) from Roger Coombes & family of Martock, £995 (16mo) from AJ Harding of Ashwick, £950 from Robert & Jayne Mayo of Weymouth. Smaller steers also wanted to £775 from Boris & Sarah Chick of Sherborne and yearlings to £525 (only 7mo) from J & W Davis Ltd of Shepton Mallet. This is definitely the time of year to sell Friesians and vendors are encouraged to take advantage of this trade.

FORWARD CONTINENTAL

A stronger show of cattle forward benefited from the increase in finished prices which pushed prices beyond expectations. This trade will encourage more vendors to sell before Christmas. Blues took top honours this week with exceptional steers from Laura Bodman of Devizes selling from £1690 (17mo) to an outstanding to £1940 (only 21mo). Several other consignments equally sold well with Blue steers from DIVA (Sherborne) Ltd selling to £1610 (21mo), Blonde steers from Paul & Olly Hurd selling to £1575 (30mo) and younger Limousin steers to £1510 from PJ & A Boulton of Pucklechurch. Charolais steers to £1305 from Boris & Sarah Chick of Sherborne. Other younger Blue steers wanted today selling to £1290 (16mo) from AJ Harding and £1235 from R Carpenter and similar younger Limousin steers to £1215 from AB Butt of Shepton Mallet.

Heifers also benefited from the stronger Beef trade with Simmental heifers 26mo to £1550 from HG Perkins & Sons of Terry Hill, Charolais heifers to £1545 19mo from Sam Jenkins & family of Pewsey and Blonde heifers to £1485 from Paul & Olly Hurd. Chaplain's Prayer

Dear Lord God. All of our Farming relies on the good earth! Help us to take care of it, to cherish and nurture it, so that it remains in fine fettle to pass on to the next generation. Thank you for our farmers, and all those who serve farming; the machinery suppliers, feed manufacturers, vets, markets, insurance and financial etc. We pray that those farmers struggling in any areas of their lives will courageously seek help when needed 🙌🙏 At the start of the week, The **NFUs** Tom Bradshaw met with the DEFRA secretary and Treasury officials to stress the significant impact of changes to inheritance tax and exactly what this would mean for family farms across the country, the knock-on impact on homegrown food production, and the stress and anxiety these planned changes are causing. Somerset Mental Health in Agriculture (**SMHAG**) can be contacted if you need immediate help with mental health and finding it difficult to cope?

All Agricultural green house gas emissions decreased between 1990-2020(16%) 2. In same period emission intensity from cattle, dairy, pigs decreased. For sheep they remained same.3. DEFRA farm practices survey indicated 64% farmers thought it important to consider GHG when making farming business decisions. 29% considered it wasn't important! 7% hadn't an opinion...Take care and May God Bless you in all you do!
