BLUE TONGUE UPDATE

On Tuesday 21st January 2025 DEFRA announced the start of the 'Low Vector period' for Blue tongue meaning that midge activity is much lower due to a lower temperature. As a result, Blue Tongue movement restrictions have been changed to allow cattle and sheep to travel from inside the restricted zone to a Livestock Market outside of the restricted zone subject to a negative Blue Tongue test.

Cattle and Sheep can now come to Frome Livestock Market from a restricted zone providing they have been pre movement tested for Blue Tongue. Please contact your local vet to arrange a test. A general licence must also be obtained from DEFRA.

Chaplain's Prayer

Psalm 23v5: 'You prepare a table before me' Next time you sit down at your table, be mindful of all the people it took to make what you have on your plate possible!? A Farmer grew it ,or raised it. A food company prepared and packaged it! A transport company shipped it. A supermarket then sold it!? The whole process from seed to table though was started by a generous giving God! 'Command those who are rich in this present age not to be haughty, not to trust in uncertain riches, but in the living God who gives us richly all things to enjoy' 1

Timothy 6 17-18....**Farm Safety** is , or should be **High Priority** in Any farm related activity!? Now(before the Spring)is a good time to review and maybe revise All safety procedures on the farm? Look at the NFU advice online '**Stay Safe and Stay Legal this Harvest**' When I was farming PTO shafts were one of the biggest areas of neglect!? The dangers are endless...as you who farm well know, so Now's a good time to review machinery and procedures ❤️

😊 Miscanthus is a low input, high yielding crop that provides important raw material for industry, and requires NO nitrogen OR Phosphates, which is particularly important in low lying water catchment areas!?... certainly worth looking at in my area near the Levels 😊 <https://miscanthusnursery.co.uk> for more info.
